## EDUCATION

### **Northeastern University**

Bachelor of Science in Economics, Minor in Data Science

Dean's List, Omicron Delta Epsilon, URI CSSH Grant Recipient

Boston, MA

May 2027

**Relevant Coursework:** Applied Econometrics, Micro & Macro Theory, Quantitative Techniques, Stats & Machine Learning, Programming with Data, Development Econ, Calculus II, American Economic History, Monetary & Fiscal Policy, Game Theory

## EXPERIENCE

### **Boston Consulting Group**

*Primary Research Co-op – PIPE Vantage*

Boston, MA

July-December 2025

- Supported 10+ private equity due diligence cases across multiple sectors, creating datasets from web-scraped competitor intelligence including executive backgrounds, facility expansions, and distribution networks from LinkedIn, Google Maps, and press releases
- Developed internal recession sensitivity tool by indexing 60 historical PE cases, identifying key macroeconomic indicators by industry vertical to enable case teams to quickly model sector-specific recession impacts on portfolio companies
- Built library of verified market models from recession sensitivity analysis, providing industry-specific frameworks to contextualize new deals within current macroeconomic environments
- Conducted primary research sourcing up to 100+ experts per deal, performing detailed background verification to ensure relevance for transaction services across healthcare, technology, and industrial sectors
- Leveraged econometric knowledge to source and construct case-specific datasets (e.g., higher education vendor analysis for IT services DD). Analyzed financial statements and created growth projections using benchmark data, delivering slide materials for final investment committee presentations under tight client deadlines

### **Northeastern University**

*Research Assistant – Professor Shariq Mohammed*

Boston, MA

May 2025 - Present

- Proofread and edited a working paper on intergenerational mobility, examining novel IV approach to track intergenerational mobility in post-Reconstruction era
- Conducted comprehensive literature review of 40+ studies on birth seasonality, synthesizing findings across economics, psychology, and public health to identify research gaps
- Replicated existing code from GitHub repositories to apply econometric models to project data, building hands-on experience with difference-in-differences and fixed effects regressions
- Organized and formatted a bibliography of over 90 sources, learning how to manage citations across various types of materials including historical documents and working papers

*President – Economics Society*

Jan 2023-Fall 2025

- Led revitalization effort expanding reach beyond freshman mentorship to increase active participation and interdisciplinary collaboration, fostering cross-enrollment with adjacent clubs
- Created a comprehensive curriculum spanning introductory workshops to advanced topics, establishing clear progression from foundational concepts to graduate level preparation

*Federal Reserve Challenge*

July 2024-Present

- Synthesize academic coursework to analyze real-time economic issues under stringent deadlines
- Conduct analysis of national economic outlook and formulate actionable strategies to address inflationary pressures
- Adapt economic models to reflect post-pandemic economic conditions, ensuring relevance and accuracy

*Finalist – Fiscal Challenge*

Jan 2024- Sept 2025

- Collaborate on a nationally recognized mock fiscal budget plan over a 30-year projection, honing skills in economic forecasting and synthesizing policy recommendations from data analysis
- Achieved third place nationally in the 2024 Fiscal Challenge, presented final proposal in Washington, DC

### **Analysis Group**

*Billing Assistant Co-op*

Boston, MA

January-June 2024

- Developing workplace fundamentals through high-volume consulting billing operations

### **Frost Valley YMCA**

*Counselor & MAC Staff* - Led wilderness expeditions through the Catskills Mountains

Claryville, NY

Summer 2021 & 2022

### **Boston Cares**

*Volunteer* - Assisting soup kitchens and aid resources in greater Boston metro area

Fall 2025 - Present

**SKILLS** Python (pandas, statsmodels), Stata, R, Econometric Analysis, Regression Analysis (DID, Fixed Effects, RD), APIs, GitHub, Excel (incl.: VBA, flexible models, PivotTables), Financial Analysis, PowerPoint, Tableau, Efficient Elements, Oxford Economics, Pitchbook, Web Scraping, Due Diligence, Primary Research, Market Sizing, Competitive Intelligence
